

The Time Paradox: The New Psychology of Time That Will Change Your Life

Your every significant choice -- every important decision you make -- is determined by a force operating deep inside your mind: your perspective on time -- your internal, personal time zone. This is the most influential force in your life, yet you are virtually unaware of it. Once you become aware of your personal time zone, you can begin to see and manage your life in exciting new ways. In *The Time Paradox*, Drs. Zimbardo and Boyd draw on thirty years of pioneering research to reveal, for the first time, how your individual time perspective shapes your life and is shaped by the world around you. Further, they demonstrate that your and every other individuals time zones interact to create national cultures, economics, and personal destinies. You will discover what time zone you live in through Drs. Zimbardo and Boyds revolutionary tests. Ask yourself: Does the smell of fresh-baked cookies bring you back to your childhood? Do you believe that nothing will ever change in your world? Do you believe that the present encompasses all and the future and past are mere abstractions? Do you wear a watch, balance your checkbook, and make to-do lists -- every day? Do you believe that life on earth is merely preparation for life after death? Do you ruminate over failed relationships? Are you the life of every party -- always late, always laughing, and always broke? These statements are representative of the seven most common ways people relate to time, each of which, in its extreme, creates benefits and pitfalls. *The Time Paradox* is a practical plan for optimizing your blend of time perspectives so you get the utmost out of every minute in your personal and professional life as well as a fascinating commentary about the power and paradoxes of time in the modern world. No matter your time perspective, you experience these paradoxes. Only by understanding this new psychological

science of time zones will you be able to overcome the mental biases that keep you too attached to the past, too focused on immediate gratification, or unhealthily obsessed with future goals. Time passes no matter what you do -- its up to you to spend it wisely and enjoy it well. Heres how.
