

Guided Visual Meditations (Book 9) - The Last Meditation

This book is a guided meditation that encourages you towards your potential self and to live your life to the full. A meditation honours your presence in the world. It concentrates on, your essence, by letting go of all the daily worries that can stress you out. This book takes a visually, guided journey through the last Gestalt law of perception called Pragnanz. This holistic view of life is often ignored as we focus on the details before us. By stepping back and watching the illustrations as they change the book offers an experience of the bigger picture. Pragnanz is about being present to both the detail and the overall picture. Once we are able to see holistically, it is possible to free ourselves from detailed concerns. The bigger picture can transform us from nit-picking over the minor details, to a universal peace, as in the often quoted phrase, the whole is greater than the sum of the parts. These visual meditations are for kindle fire and kindle fire apps on PC, mobile phone or tablet. They are best seen slowly. As you breathe into what you see tap the screen to maximise the picture or use a PC slide show. I would love to watch a meditation whilst waiting for the dentist or an interview. Their potential has yet to be realised. So get ahead of the wave and surf yourself to a calm, holistic and peaceful place. I hope you enjoy this one.
