

Internet Marketing How do you launch a successful online business fast? How do you monetize it quickly and start making a profit right away? How do you attract new clients and customers? How do you automate the process so you get paid well? And can all this really be done in 90 days or less? In this short book we'll be covering all this and lots more. It's based on an interview I did with business coach, marketing expert and all around great guy AJ Amyx. AJ is the host of AMYX TV and founder of the Passionpreneur Academy. He trains entrepreneurs all over the world who are authors, speakers and coaches on how to attract new clients, how to create high-end programs and how to automate their marketing and sales so they get paid well! He runs a specialist program that helps people launch and monetize a business in 90 days or less. AJ is a business coach, marketer, consultant and free spirit. But at his core, he just wants to help people get paid for their passions and make a difference in the world – since that is what he gets to do every day! I loved doing this interview – AJ is such a great guy to talk to. And he's smart too – it's packed with great ideas on how to grow your business fast.
